Product Designer specializing in enterprise AI and data platforms for technical users. Shipped a 0-to-1 GenAI governance platform adopted across QuickBooks, TurboTax, and Mailchimp; redesigned data engineering workflows with measurable production impact. CS and product management background enables fluent collaboration with engineering from concept to launch — including prototyping with Claude Code and AI tools to move from concept to high-fidelity faster.

work experience

Product Designer - AI+Data Platform | Intuit

Jun 2023 - Present | Mountain View, CA

- Leading end-to-end design for an agentic data discovery initiative — prototyping natural language search across five platforms, defining data model architecture with PMs and architects, and aligning multiple engineering teams on a vision that replaces manual lookup with autonomous, context-aware data surfacing.
- Redesigned data production/promotion workflows used by Intuit's data engineers, increasing clean data rates from 40% → 78% and eliminating data incidents, outcome driven by reusable widget system with inline validations and guided UX.
- Launched a GenAI Use Case Registry adopted across TurboTax, QuickBooks, and Mailchimp, onboarding 7,600+ AI features and establishing a unified standard for evaluating, reviewing, and shipping AI responsibly.
- Prototyped 0→1 agentic concepts rapidly using Claude Code and AI-assisted workflows, validating novel interaction patterns through research feedback loops and reducing design-to-engineering handoff friction.

Product Design Intern - AI Platform | Intuit

May 2022 - Aug 2022 | Mountain View, CA

- Designed and shipped a real-time ML infrastructure dashboard for executive stakeholders, surfacing model spend, resource allocation, and anomaly signals across a multi-million dollar AI portfolio, translating complex ML system data into clear, decision-ready interfaces.

Product Management Intern - Wallet Platform | LINE Corp

Jun 2021 - Aug 2021 | Gyeonggi-do, Korea

- Designed a personalized gift recommendation experience for LINE's gifting platform (200M+ users across Japan, Thailand, Taiwan) — querying behavioral datasets with SQL across user demographics, contextual signals, and engagement metadata to surface a data-driven model behavior that balanced user delight with revenue impact.

UX Design Intern | Duotone

Apr 2021 - Jun 2021 | Seoul, Korea

- Drove UX strategy for rebranding initiatives across multiple global enterprise websites, restructuring information architecture and page hierarchies to strengthen brand clarity and enable faster user navigation.

Product Manager | Gooroomee

Jul 2020 - Apr 2021 | Seoul, Korea

- Owned product strategy and UX design across B2B and B2C video communication products, prototyping features for enterprise clients, defining access logic for new pricing tiers, and launching a video interview product adopted by 2,000+ users.

education

University of Michigan

M.S. Information —
UX Design and Research

Ewha Womans University

B. Eng. Computer Science
B.A. Digital Humanities

skills

AI Tools

Claude Code, Cursor, Figma Make, Builder.io, Lovable, v0

Design

Figma, FigJam, Agentic UX Patterns, LLM Interaction Design, Design Systems, Interaction Design, Information Architecture, Rapid AI Prototyping, User Flows, Data Visualization

Research

Contextual Inquiry, Usability Testing, Surveys, Competitive Analysis, Data Analytics, Heuristic Evaluation

Technical

HTML, CSS, JavaScript, React, Git, Python, SQL
