UX Designer with 4+ years of experience designing **AI and data platforms**, specializing in enterprise tools for data scientists, analysts, and engineers. With a background in computer science and product management, I translate complex workflows into intuitive, production-ready experiences. I partner closely with engineering, data, and product teams to drive platform adoption, standardization, and measurable business impact.

work experience

Product Designer - AI+Data Platform | Intuit

Jun 2023 - Present | Mountain View, CA

- Leading end-to-end design for Intuit's internal data processing platforms used by data engineers to build, transform, and operationalize data at scale.
- Redesigned data production and promotion workflows across multiple data platforms by introducing validations and guided experiences, increasing clean data rates from 40% to 78%.
- Launched a GenAI Use Case Registry that standardized how multiple product teams evaluate and ship AI features, onboarding 7.6K+ use cases across TurboTax and QuickBooks teams.
- Partnered closely with data scientists and engineers to define technical workflow requirements, translating complex system constraints into scalable UX patterns.

Product Design Intern - AI Platform | Intuit

May 2022 - Aug 2022 | Mountain View, CA

- Designed and prototyped a cost management dashboard enabling AI leaders to monitor model investments and optimize resource allocation.
- Collaborated with engineers to define system requirements and interaction patterns for data-heavy dashboards.

Product Management Intern - Wallet Platform | LINE Corp

Jun 2021 - Aug 2021 | Gyeonggi-do, Korea

LINE is a messenger app that has 200M active users in Japan, Thailand, and Taiwan. In the app, users can send gifts via chat and this drives 90% of its revenue in Japan.

- Used SQL to query multi-dimensional behavioral data — user demographics, contextual signals, and gift metadata — to map end-to-end gifting journeys and surface a personalization opportunity within LINE's highest-revenue feature.
- Translated data findings into a recommendation system proposal, defining the logic, user experience, and monetization rationale for a data-driven gifting feature.

UX Design Intern | Duotone

Apr 2021 - Jun 2021 | Seoul, Korea

- Drove UX strategy for rebranding initiatives across multiple global enterprise websites, restructuring information architecture and page hierarchies to strengthen brand clarity and enable faster user navigation.
- Diagnosed usability and content issues through rigorous heuristic evaluation, and facilitated cross-functional workshops to translate stakeholder goals into cohesive, narrative-driven design solutions.

Product Manager | Gooroomee

Jul 2020 - Apr 2021 | Seoul, Korea

- Led design and launch of a video interview platform used by 2,000+ interviewees, designing role-based access and distinct UX flows for different user types and pricing tiers.
- Designed CMS and core UX workflows for live course platform, improving student engagement and instructor content management.
