Product Designer specializing in enterprise AI, data, and developer platform experiences for technical users. Drives 0→1 platform initiatives through systems thinking, cross-functional alignment, and technical fluency, designing complex workflows for engineers, data scientists, and enterprise stakeholders.

/work experience

Product Designer - AI+Data Platform | Intuit

Jun 2023 - Present | Mountain View, CA

- Led design for an enterprise data discovery initiative spanning five internal platforms, defining natural language search workflows for data analysts and engineers while aligning PMs, engineering teams, and leadership around platform direction and architectural decisions.
- Redesigned mission-critical data production workflows for data engineering teams, improving clean data rates from 40% → 78% and eliminating recurring production incidents through guided validation patterns and workflow safeguards.
- Designed a visual pipeline editor replacing 1,000+ lines of configuration code, enabling data engineers to manage complex DAG workflows through dependency visualization and pre-execution validation.
- Designed and launched a centralized GenAI governance platform aligning product, legal, security, and program management stakeholders across Intuit brands, standardizing AI review workflows for 7,600+ use cases while eliminating manual spreadsheet-based tracking.

Product Design Intern - AI Platform | Intuit

May 2022 - Aug 2022 | Mountain View, CA

- Designed and shipped a real-time ML infrastructure dashboard for executive stakeholders, surfacing model spend, resource allocation, and anomaly signals across enterprise AI systems to support operational decision-making.

Product Management Intern - Wallet Platform | LINE Corp

Jun 2021 - Aug 2021 | Gyeonggi-do, Korea

- Designed a personalized gift recommendation experience for LINE's mobile gifting platform serving 200M+ users across Japan, Thailand, and Taiwan, using SQL-based behavioral analysis across demographics, engagement patterns, contextual signals, and gift metadata to drive recommendation strategy for a core revenue-driving product.

Product Manager | Gooroomee

Jul 2020 - Apr 2021 | Seoul, Korea

- Owned product strategy and UX design across B2B and B2C video communication products spanning web and mobile platforms, defining enterprise access models, pricing-tier logic, and interview workflows adopted by 20K+ users.

/projects

Responsible AI Checker (self-initiated) | rai-checker.vercel.app

- Built a self-assessment platform helping solo founders evaluate AI product risk across six categories using adaptive scoring models grounded in the EU AI Act, NIST AI RMF, OWASP LLM Top 10, and GDPR frameworks.
- Designed a weighted risk-scoring engine with contextual severity multipliers and implementation guidance categorized by effort level, enabling non-technical builders to prioritize responsible AI improvements.

/education

University of Michigan

M.S. Information —
UX Design and Research

Ewha Womans University

B. Eng. Computer Science
B.A. Digital Humanities

/skills

AI Tools

Claude Code, Cursor, Figma Make

Design

Figma, Design Systems, Interaction Design, Information Architecture, Data Visualization, Enterprise Workflow Design

Research

Contextual Inquiry, Usability Testing, Surveys, Competitive Analysis, Data Analytics, Heuristic Evaluation

Technical

HTML/CSS, JavaScript, React, SQL, Python
