

Product Designer specializing in enterprise AI, data, and developer platform experiences for technical users. Drives 0→1 platform initiatives through systems thinking, cross-functional alignment, and technical fluency, designing complex workflows for engineers, data scientists, and enterprise stakeholders.

/work experience

Product Designer - AI+Data Platform | Intuit

Jun 2023 - Present | Mountain View, CA

- Led design for an enterprise data discovery initiative spanning five internal platforms, prototyping natural language search to align PMs, engineering teams, and leadership around architectural decisions, and shipping a proof-of-concept that cut time to find and certify a metric from 4 weeks to under a minute.
- Redesigned mission-critical data production workflows for 500+ data engineers, improving clean data rates from 40% → 78% and eliminating critical data incidents (35 → 0) through guided validation patterns and workflow safeguards.
- Designed a visual pipeline editor replacing 1,000+ lines of configuration code, enabling data engineers to manage complex DAG workflows through dependency visualization and pre-execution validation.
- Designed and launched a centralized GenAI governance platform aligning product, legal, security, and program management stakeholders across Intuit brands, standardizing for 7,600+ use cases and cutting launch review time from 9 weeks to 3 while saving program managers 20 hours/week of manual tracking.

Product Design Intern - AI Platform | Intuit

May 2022 - Aug 2022 | Mountain View, CA

- Designed and shipped a real-time ML infrastructure dashboard for 60 executive stakeholders, surfacing model spend, resource allocation, and anomaly signals across 200 teams and \$1.1M+ in monthly AI infrastructure spend to support operational decision-making.

Product Management Intern - Wallet Platform | LINE Corp

Jun 2021 - Aug 2021 | Gyeonggi-do, Korea

- Designed a personalized gift recommendation experience for LINE's mobile gifting platform serving 200M+ users across Japan, Thailand, and Taiwan, using SQL-based behavioral analysis across demographics, engagement patterns, contextual signals, and gift metadata to drive recommendation strategy.

Product Manager & UX Designer | Gooroomee

Jul 2020 - Apr 2021 | Seoul, Korea

- First and only Product Manager at an early-stage startup, owning product strategy and UX across B2B and B2C video communication products serving 3.3M+ users and 750+ clients. Defined enterprise access models and pricing-tier logic, and launched an interview platform adopted by 180+ enterprise clients through collaboration with sales, engineering, and design teams.

/projects

Raidy - Responsible AI Checker

- Built a self-assessment platform helping solo founders evaluate AI product risk across six categories using adaptive scoring models grounded in the EU AI Act, NIST AI RMF, OWASP LLM Top 10, and GDPR frameworks.
- Designed a weighted risk-scoring engine with contextual severity multipliers and implementation guidance categorized by effort level, enabling non-technical builders to prioritize responsible AI improvements.

/education

University of Michigan

M.S. Information —
UX Design and Research

Ewha Womans University

B. Eng. Computer Science
B.A. Digital Humanities

/skills

AI Tools

Claude Code, Cursor, Figma Make

Design

Figma, Design Systems, Interaction Design, Information Architecture, Data Visualization, Enterprise Workflow Design

Research

Contextual Inquiry, Usability Testing, Surveys, Competitive Analysis, Data Analytics, Heuristic Evaluation

Technical

HTML/CSS, JavaScript, React, SQL, Python
